# JD4506K

## PET Battery Tape

### Description:

Using double-layer polyester film as the base material, JD4506K tape features high tensile strength, excellent insulation properties, and resistance to punctures and scratches. The special adhesive formula ensures no residue is left on the adhered surface upon removal, meeting the requirements for fully automated production. The structural design with a backing film effectively reduces roll change time during the production process, minimizes labor hours in lithium battery manufacturing, and enhances

### Application:

Specifically designed for wrapping the casing of power batteries and bundling battery packs, it provides insulation and protection for lithium batteries once charged. It is also suitable for areas of non-lithium battery products that require high levels of protection.
